LIBRARY DATABASES

The Research Library of TSU provides access to abstract, bibliographic, full-text, subject-specific and polythematic databases of articles, dissertations, monographs, textbooks and miscellaneous resources. The Library subscribes to the Russian and foreign licensed resources if there have been written requests, suggestions and recommendations from the university departments.

Library Resources section contains information about electronic resources available in the TSU Research Library. There is a full list of databases with short descriptions, terms and period of access, and guidelines for using them.

You may find a subject-specific database (a list of electronic resources on a particular subject) and check the terms of access in the **Subject areas**.

LIBRARY DATABASES

Access to electronic resources:

1. **The Digital Dissertation Library of the Russian State Library** and such databases as Garant, Consultant Plus, VINITI, INION and some others can be accessed <u>only from the computers of the Research Library</u>;

2. Remote licensed resources can be accessed from the computers connected to the TSU network and off campus as well (for the Research Library users with valid Reader Cards).

You may address a reference librarian in any Reading Room for a consultation on using electronic resources.
